Organic Greek Sage

Salvia officinalis L.

Cut leaves, 2-3 cm

25 g PET retail jar

Certified organic · Origin: Greece
BIO HELLAS · GR-BIO-03

OREGANO - PROFESSIONAL PACKAGED FORMATS

Organic Greek Oregano is also available in 250 g, 500 g and 1000 g PP packs for professional use. Case and pallet information is available to professional buyers on request.

Mantinea Herbs specialises in finished packaged products rather than bulk commodity supply.

RETAIL PACKAGING

Designed to protect product quality and support shelf presentation.

The established Mantinea Herbs retail format combines protective closure features with a lightweight, shelf-ready presentation.

Induction-sealed

An aluminium induction seal helps limit air exposure before first opening and supports aroma and essential oil retention.

Light protection

The full-coverage label helps shield the herbs from direct light, supporting colour and overall product quality.

Reclosable cap

A reclosable cap supports convenient day-to-day storage after first opening.

Lightweight PET

Food-contact-compliant, recyclable PET provides a lightweight format for retail distribution and export logistics.

36 MONTH SHELF LIFE

Storage: keep dry at 5-25 °C and ≤60% RH, away from direct sunlight. Product specifications and available laboratory documentation are provided to professional buyers on request.

WHOLESALE & DISTRIBUTION

Finished packaged products for professional buyers.

Retail-ready and professional foodservice packs for importers, distributors, retailers and HORECA buyers. We specialise in finished packaged products rather than bulk commodity supply.

Flexible trial orders

Branded packaged products

We welcome trial orders from qualified professional buyers.

B2B samples

Complimentary evaluation samples

Available to qualified professional buyers, with shipping included.

36 months

Shelf life

A long retail shelf life supports distribution planning.

9 export markets

International experience

Europe, North America, Asia, Africa and Australia.

B2B DOCUMENTATION

Detailed product specifications, organic certification information, available laboratory documentation, packaging information and commercial configuration details are available for buyer review. Case and pallet information is provided on request.

PRIVATE LABEL

Your brand. Our Greek herbs.

A shelf-ready private-label programme with mixed-product capability, artwork support and packaging-development
options.

2 full Euro pallets

Private-label MOQ

Mixed products accepted across oregano, mountain tea and sage.

~60 days

Typical lead time

From final artwork/label approval and order confirmation.

Artwork support

Artwork supplied by you - or developed by us

We apply the label and deliver a finished, shelf-ready product.

Approval sample

Review before production

A labelled approval sample is prepared for review before production.

TWO PACKAGING ROUTES

1 · Established retail format

Use the current Mantinea Herbs retail jar, cap and size with customised artwork and label.

2 · Alternative project

Alternative glass-jar designs and capacities, or larger PET formats, can be discussed according to project requirements.

Organic labelling can be supported for EU and U.S. destination markets, where applicable. EU-certified organic products may trade under the U.S.-EU Organic Equivalence Arrangement, subject to destination-market labelling and shipment-documentation requirements.

PRODUCTION & QUALITY

From propagation to packing.

Managed production processes and supporting documentation support product identity, consistency and buyer due diligence.

1
Propagation

Seedbed creation and controlled early plant growth.

2
Field preparation

Raised beds and certified ground covers support cultivation.

3
Harvest

Selective hand harvesting at the appropriate stage.

4
Natural drying

Airflow drying in dark, humidity-free surroundings.

5
Processing

Sifting and cleaning before final packing.

QUALITY FRAMEWORK

Certified organic

Reg. (EU) 2018/848 · BIO HELLAS · GR-BIO-03.

HACCP documentation

Food-safety documentation is maintained in support of Reg. (EC) 852/2004.

Laboratory documentation

TÜV Austria laboratory analyses are available to professional buyers on request.

Planned next step

ISO 22000 is the next planned certification step and is not currently held.
